

FACT SHEET

Who We Are

CI-2 is a unique consulting company dedicated to improving the effectiveness of organizations – both government and commercial. The current business climate is complex and ever-changing, making it a challenge for organizations to succeed in controlling projects and processes. By applying standards and best practices, and using experts who are deeply committed to and invested in your success, we develop and deliver strategic solutions that are both effective and unique. Our strategic solutions are based on your distinctive needs, your corporate culture, and the resources available to you. With real-world experience in implementing change, we provide expertise that helps you meet – and exceed – your goals.

By helping you integrate relevant processes – and by leveraging dynamic tools such as performance analysis, change management, and leading-edge management techniques – our experienced professionals deliver effective solutions that provide measurable benefits to you.

CI-2 staff members are certified, committed experts who take ownership of challenges and work closely with clients to ensure successful results.

What We Do

Strategy, Change, and Management Consulting

Every organization strives to succeed and thrive in their business environment. CI-2 partners with clients to improve process and manage change. Using our expertise, we assist and educate organizations in all aspects of business intelligence (BI), strategic management, business process re-engineering (BPR), change management, and portfolio/program/project management and implement strategies that form a roadmap to continued organizational effectiveness.

Certified Project Management Professionals

Software and Application Development

CI-2 implements custom SharePoint sites and develops desktop and web-based software solutions, employing reliable and repeatable processes that guarantee project success.

Custom Development Solutions

Performance Measurement

CI-2 works with IT organizations to identify metrics that provide insight into the day-to-day and long term efforts of every office. We establish measures that spotlight problem areas early, so that adjustments can be made to quickly eliminate or resolve issues before they escalate. With a results-oriented approach, our clients experience demonstrable success.

Concepts Integration creates solutions that complement each other, guaranteeing greater effectiveness and making the most of your investment.

One Example - Balanced ScoreCard

A Balanced ScoreCard is a precise tool that can be used to determine how current processes are helping to achieve business goals.

We can assist each group within your organization in developing clear and measurable indicators of performance and in instituting a performance measurement program for collecting, reporting, and analyzing data. Aligning results through each layer of your organization.

It is our goal to reduce complexity, improve your productivity, and teach you the tools you need in order to quickly adapt to changes in the business environment.

Mission Statement

To provide clients with the right solution at the right time by expertly integrating established methodologies and best practices into organizations, and by providing the insight and guidance of proven professionals with experience in achieving project and program success.

Vision

CI-2 seeks to foster an environment that engages and retains knowledgeable and skilled experts who excel at decoding ever-changing business environments and translating client needs into realistic, usable solutions. CI-2 emphasizes having a clear focus on success and taking ownership of client expectations over the concerns of corporate profitability. CI-2 staff members are dedicated to truly being the best and brightest in the industry.
